

# PET SAFETY TIP

## Lilies *Highly Toxic to Cats*

The most toxic lilies include Tiger, Day, Asiatic, Easter, or Japanese Show Lily.

All parts of the plant – leaf, pollen, stem, and flower are considered poisonous. Even small ingestions can result in severe kidney failure within 24-72 hours.

Lilies are a popular flower to include in bouquets so be extremely cautious when bringing flowers into your home.

Common signs of poisoning include:

- Vomiting
- Not eating
- Lethargy
- Dehydration
- Not urinating or urinating frequently
- Not drinking or excessive thirst
